the Chinese sngar-esue. Last spring I purchased a dollar's worth of the seed and planted it in the early part of March, in rows about four feet apart, and in the drill, one and two seed every six inches. My intention was to make forage, having very little confidence in it, gaschurine qualities; but I was iuself and Captain P. H. Stauton selected

an effart to procure syrup from it. Mynelf and Captain P. H. Stauton selected
dere cabe; seems lap one inche in diame er,
and from eights to nine feet long, which
yielded are quarts of judec; ten more of
the same sine, which had been cut one day
and night, gave the same quantity; and
again ten from his patch, measuring one
and one-cighth of an inch in diameter,
yielded six quarts, wanting a gill or halfpint.

We cut all the cane for boiling, firespective of size or age. We put two
hundred guillons of the juice in the boiler
for the fast boiling, and after boiling
glowly for ten bours, took out twenty gallons of very good syrup. The next day
we carried one hundred and seventy gallons they the same process, only increasing the fire, boiling it in seven hours,
and obtained sixteen gallons of appearance,
sure.

As the pot began to boil, we put lime
in each boiling, being governed in quantity somewhat by the report of Ex-Goverron Hammond of South Carrolines.

My seed planted nearly half an acre; no
boiltet and eithing to make a good exticle,
and whe tail it a hundred. The arrival of the same process
on is that they do not holl t sufficiently.

If they make more than one gallon out of
him patch sketch is, I have heared of some
boiltet may be a proporation of the public and the processor.

The following remedies are offered to the public and
defined and support to the control day
and night, gave the same process of the support of medical promarked with the stimost skill which the medical section of the public and
they developed the same of the control of the

unless the cane is far superior to what we ground. It should be boiled down until
